Center for Precision Industry Value Proposition

St.Gallen
Bodensee
Area

Very attractive facilities

- core and shell construction as a perfect basis for individual interior fitting
- especially suitable environment for clean rooms, cost efficient thanks to serial implementation
- ideal also as office, research lab, production location etc.

Services for companies & networking

- premium access to the Interstate University of Applied Sciences NTB: experts and equipment, strategic cooperation and partnerships possible and desirable
- ability to hire professionals from the University NTB temporarily (e.g. for projects)
- company-specific education and training services available
- access to subsidized research projects
